ABOUT ME

I'm a novice software developer with a 15-year background in journalism and PR.
Over the past year, I have completed two intensive Software Development bootcamps (EdX and Northcoders) and finally ready to merge my storytelling power with tech skills and become a pro at creating user-friendly and valuable apps.

EDUCATION

Front-End Web Development
EdX   UK, 2023-2024

Full Stack Web Development
Northcoders   UK, 2022-2023

Journalism
MSU   Russia, 2003-2008

SKILLS

- React
- HTML
- CSS
- Bootstrap
- Node.js
- JavaScript
- Git
- Vite
- Canva
- JQuery

RIGHT TO WORK

- United Kingdom (Settled status)
- EU (Italian citizenship)
- Russia (Russian citizenship)

DEVELOPMENT AND RELATED EXPERIENCE:

Front-End Web Development Bootcamp Trainee   2023 - 2024
EdX | United Kingdom (Remote)

As a graduate of the Front-end Web Development Bootcamp, I've gained expertise in HTML5, CSS3, JavaScript, React.js, and Node.js, along with API integration and UX design. Additionally, I was challenged to code a diverse developer portfolio encompassing three types: pure CSS, Bootstrap, and React with React Bootstrap (all 3 were accepted and successfully completed).

Coding Bootcamp Trainee   2022 - 2023
Northcoders | Manchester (Remote)

I successfully completed a 13-week Coding Bootcamp, where I gained proficiency in test-driven development, pair programming, got practical experience with Node.js, APIs, and databases. This experience significantly enhanced my coding and problem-solving skills.

PROJECTS

Personal portfolio created with React & Bootstrap

A showcase for the developer's skills, projects and professional experience.
Deployed app: https://chernova.dev
GitHub repo: https://github.com/Anna702/React-App-Portfolio

AnswerSphere

A magical pendulum for those awaiting signs from above (powered by OpenAI), was created by a team of 5 students:
Deployed app: https://answersphere.netlify.app
GitHub repo: https://github.com/nyitrai87/answersphere

Grin And Gin

As part of our Front-End Skills Bootcamp, this app was designed by international group of 3 students to simplify cocktail mixing and culinary pairing.
Deployed app: https://anna702.github.io/GrinAndGin
